

Project: Southwark Council

Value: £42,300.00 // Completion Date: October 2009

Graphic Image were enlisted to supply and install coloured-transparent films to interior glazing. The pattern was to remain random with different colours used on each elevation with different spacing between each strip. This gave each office a unique look.

The project was split over six floors and took eight weeks to complete. Graphic Image also supplied frosted films to exterior facing glass, solar control films to roof glazing and internal DDA dots across all floors.
